

SAMCO

Uncoilers Coil Cars Hold Downs

20,000 lb Coil-Car
and Uncoiler
Combination

Samco produces a complete line of **Uncoilers, Uncoiler/Coil Car Combinations** and **Hold Downs** integral to the uncoiler, stand alone Hold Downs and **Coil End Welders** for the metal working industry.

10,000 lb
Double Ended Hydraulic Uncoiler

Samco Uncoiler and Coil Car Combinations are engineered to suit individual application.

Samco Coil Cars can be matched with existing equipment.

Downtime caused by coil loading and coil changing is lost production time. A portion of this lost time can usually be converted to production time with proper coil handling procedures.

Call Samco for a no cost analysis and recommendation on how your firm can save time on coil handling procedures, and improve manufacturing profitability.

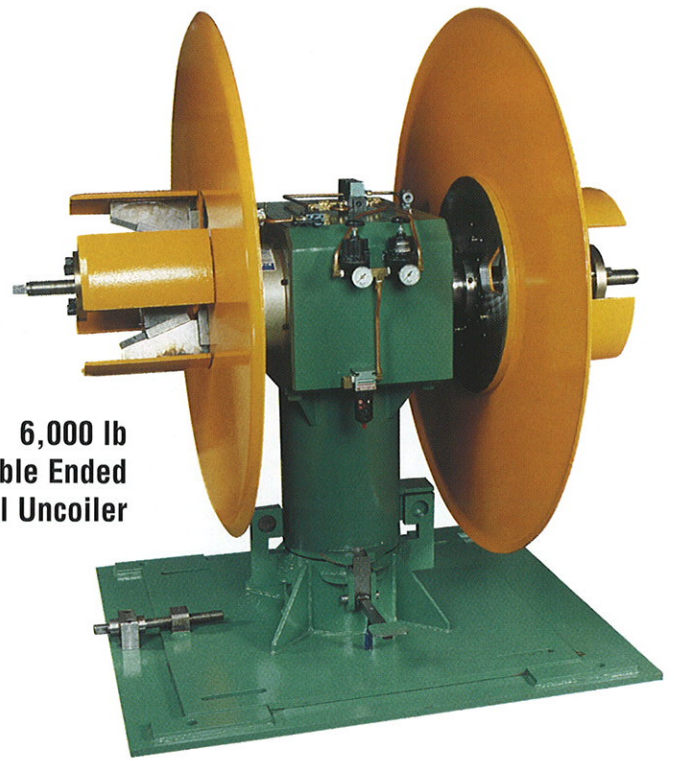

**Stand Alone Hold Down
and Feed Up Table**

Samco Stand Alone Hold-Downs are an economical way to provide a safe method of controlling heavy gauge strip while feeding from an uncoiler to succeeding operations.

Samco Coil End Welders improve safety and strip feeding into rollformers and other similar operations.

**Self Contained Coil Car
with Built-In Hydraulic
Unit, with 24" of Lift.**

**6,000 lb
Double Ended
Manual Uncoiler**

Samco's Uncoilers are built rugged to handle heavy gauge steel coils, day after day, shift after shift. Sizes range from 3,000 to 40,000 lb capacity.

Features include:

- Coil size backing plates in 60", 72" or 80" diameter for accurate pay-off.
- Four leaf expansion on the mandrel for improved coil holding ability, and maintaining roundness of the coil inside diameter.
- Mandrel lengths to suit any application.
- Manual or hydraulic mandrel expansion.
- Double ended uncoilers have an adjustable base feature to facilitate alignment for down stream processing.
- All steel weldment construction.

Samco Uncoiler options can be tailored to suit any application:

- Hydraulic powered rotation.
- Electric or hydraulic feed-up drives.
- Hi-speed uncoiler to fill accumulators or tube mills.
- Dancer arms or sonic loop controls.
