

Ring Curving Rollforming Line

The Ring Curving Rollformer takes a flat piece of brass, forms it, and then curves it from a minimum of 7.5" in diameter to 57" in diameter. Like all Samco rollformers, it is engineered for high volume and high quality.

Key Features include:

- Coil reel for Material Handling (Customer Supplied) to store stock material and provide to the system as required
- Entry guide system with additional intermediate Edge Guide system Pass to align stock material
- 4 Pass Gear Mill Rollformer to form brass rings
- Driven Curving Unit with adjustable controls to allow automatic setting of ring diameter
- Hi Carbon & HiChrome Roll Tooling set hardened and grounded to specification and designed by Samco
