

Boxed C-Channel Purlin Line

This heavy duty, high efficiency rollforming line produces C purlins from a double duplex thru shaft rollformer with quick roll tooling changeovers allowing the machine to produce “legs up” and ‘legs down” product.

Key Features include:

- Double Duplex Thru-Shaft Rollformer allows for variable web, leg, and return dimensions with no tool change.
- Powered Launching conveyor system launches pre-cut strips to the entry guide of the rollformer and provides accurate strip alignment into the rollformer.
- Pre-Punch / Notch Presses system with inline stationary cut-off shear with the capability to rotate punch dies and gag if required
- Automatic Roll Flipping system allowing for C purlin channel to first run ‘legs up’ and switching to run second C purlin channel ‘legs down’

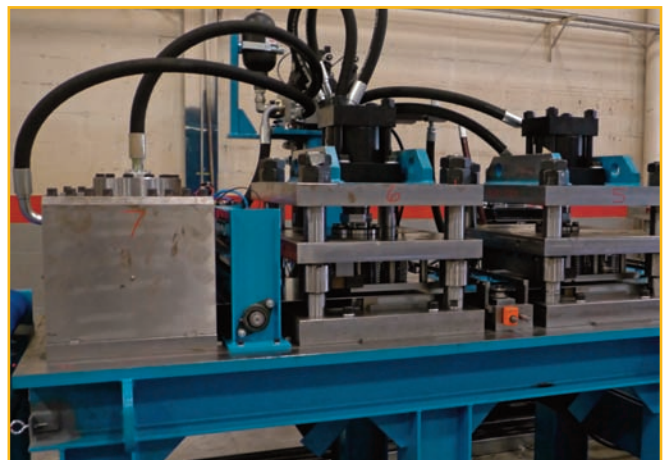

A short video of this machine is available on YouTube at: <http://youtu.be/hFIKsjEf288>
