

Greenfield™ Stud and Track Rollforming Line

The Greenfield™ is a complete rollforming system which produces 97% of all the stud and track sizes commonly used today. It is designed to reduce scrap and minimize downtime while at the same time allowing for quick installation and low maintenance requirements.

Key Features include:

- “One Touch Set Up” running multiple sizes at the touch of a button
- 3 dedicated dies resulting in quick die change, with no hydraulic changeovers (clean) and higher quality punching requiring minimal operator skill.
- Industry leading ‘docking’ connection between the press assembly and roll former resulting in fast installation and 100% accurate alignment between sub-assemblies
- A Post-cut Flying Cut-off Press with inserts ensuring high production speeds of high quality parts with almost zero flare
