

## Gutter Rollforming Line

This high efficiency gutter rollforming line produces gutters from 300mm up to 10m in length. Featuring a post-cut on the fly continuous operation for high volume productivity, the line also includes uncoiler, roll former, flying cut-off press, and powered run out table. Customer supplied dies and cassettes can be fully integrated.

### Key Features:

- Double Ended Uncoiler allows the next coil to be prepared while the first one is still running
- 23 pass Rafted Rollformer with variable speed drive VFD and motor system
- High speed hydraulic action suitable for inline cut-to-length on the fly continuous operation
- Powered run-out table for easy collection of finished product
- Quick connect electrics including Mill Jog/Run selector, Jog Forward and Reverse selection and Emergency Stop button
