

Structural Member Rollforming Line

Samco's Structural Member Rollforming Line is a heavy duty, high efficiency rollforming line, taking heavy gauge, high strength materials and rollforming it pre-cut and pre-punched into U-channel form. Like all Samco rollformers, it is engineered for high volume and high quality.

Key Features:

- Runs materials with yields of 460 MPa - 660 MPa;
- Allows adjustable web and flange heights over a range of gauges;
- Allows for quick gauge changeovers at the touch of a button;
- Rafted rollformer for quick profile changeover

Benefits Include:

- Substantial profile combinations for maximum production flexibility;
- Rafted design minimizes tooling changeover times;
- Heavy duty gearbox and drive systems, shafts, and stands ensure years of trouble free production
